

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## REPORT OF THE ANTHROPOLOGICAL SECTION.

Five meetings have been held during the past year, at which communications were made by Prof's. Brinton, Allen, and Culin, and a special communication on "Primitive Transportation," by Prof. Otis T. Mason, of the National Museum, Washington, D. C. A committee was appointed to consider the question of obtaining space in the old museum hall for the collection of crania possessed by the Academy. Mr. John G. Rothermel was elected Treasurer, to succeed Dr. M. V. Ball, resigned. The death of Dr. Harrison Allen left vacant the Directorship, which office he has filled since the organization of the Section. At the December business meeting a quorum was not present, and the annual election could not be held, the officers of the Section being continued until the next meeting. The office of Director remains vacant.

## REPORTS OF THE PROFESSORS.

ANGELO HEILPRIN, PROFESSOR OF GEOLOGY, reports that the work in his department during the past year has been confined mainly to its educational aspect. The regular spring course of instruction was comprised in twenty-six lectures and eight field demonstrations, the attendance at which, while smaller than in the corresponding period of the year before, was sufficient to indicate a live interest in geology and an appreciation of the opportunities that were offered for practical study. As in previous years a large part of the classes was composed of school teachers. A special course of six lectures was delivered under the auspices of the Ludwick Institute in November and December, with the largest attendance yet secured in the Academy, the record showing an average of 163 for each lecture.

The condition of the collections in the department of geology remains unchanged. There is a deficiency of case-room, and immediate relief can hardly be looked for. Some rearrangement of the collections has been made under the direction of the Curators, both in the old and in the new museum buildings, but a large part of the specimens must still be placed in the drawers of the cases.

Additions to this department of the Academy's museum, and notably to the affiliated department of paleontology, have been re-
